AI – Academics to Advancements in Practical Applications

Organized by: Google Developer Groups – Vishnu Institute of Technology
Date: 20/12/2025
Venue: C-Block, First Floor, Seminar Hall

Overview

The AI Expert Talk titled *"AI – Academics to Advancements in Practical Applications"* was organized by Google Developer Groups (GDG) – Vishnu Institute of Technology with the intention of helping students understand how Artificial Intelligence concepts taught in classrooms are applied in real industry environments.

The session focused on addressing the common gap students face between academic learning and practical implementation. By bringing together perspectives from both startups and large enterprises, the event helped students gain a clearer understanding of industry expectations, real-world AI use cases, and potential career pathways in the field of Artificial Intelligence.

Distinguished Guests

The event was graced by experienced industry professionals who shared their knowledge and practical experiences with the students:

- **Raja Suman Karingula** – Founder, Unbusy Studio

- **Sasi Srighakolapu** – Vice President, J.P. Morgan Chase

The program was conducted with the guidance and support of Vice Principal Sri Lakshmi Madam and Faculty Coordinator Harsha Sir.

Total number of students attended: 191

The presence of the speakers and academic leadership encouraged students to actively participate and explore the practical side of Artificial Intelligence beyond textbooks.

Event Highlights

- The event began with an address by the Vice Principal, who spoke about the importance of industry-oriented learning and the growing relevance of Artificial Intelligence across domains.

- The first session focused on AI applications in startups, where students learned how innovation, experimentation, and real-time problem solving play a key role in product development.

- The second session provided insights into enterprise-level AI usage, highlighting industry standards, expectations, and how large organizations implement AI at scale.

- Students actively engaged during the feedback and question-and-answer session, where many academic and career-related doubts were clarified.

- A short highlights video of the event was screened, followed by the formal felicitation of the speakers in appreciation of their valuable contributions

Conclusion

The AI Expert Talk was successfully conducted and served as a meaningful learning experience for the students. Under the leadership of Organizer Yaswanth, with academic guidance from Faculty Coordinator Harsha Sir and encouragement from Vice Principal Sri Lakshmi Madam, the event achieved its objective of connecting academic knowledge with practical industry applications.

The sessions delivered by Raja Suman Karingula and Sasi Srighakolapu provided students with valuable insights into real-world Artificial Intelligence practices and career opportunities. Active student participation and coordinated efforts from the GDG team ensured the smooth execution of the event, marking it as another impactful initiative under GDG Vishnu.
