Event: Hands-on Workshop on Prompt Engineering

Organized by: Google Developer Groups (GDG), Vishnu Institute of Technology
Date: 18/09/2025
Venue: Open Labs, C Block

Resource Persons:

- Mr. Harsha – Faculty Coordinator
- Pranav – AI Lead
- Vinay Ranjan – AI Co-Lead

Objective

The workshop was conducted to help first-year students understand the basics of Artificial Intelligence and Prompt Engineering. As AI tools are increasingly used in modern problem-solving and creative work, the session focused on teaching students how to write effective prompts to obtain clear and useful AI-generated outputs. The workshop also helped students become familiar with GDG and its community-based learning culture.

Session Highlights

- **Introduction to GDG:**
  An overview of GDG, its vision, and the opportunities available for students to learn and grow through community initiatives.

- **Basics of AI & Prompt Engineering:**
  Explanation of commonly used AI tools, their real-world applications, and why prompt design plays a key role in getting accurate results.
- **TCREI Prompt Framework:**
  Step-by-step guidance on using the TCREI structure to improve clarity, creativity, and

quality of AI responses.

- **Hands-on Activities:**
  Interactive tasks that allowed students to apply prompt engineering concepts in a practical way.

Practical Demonstrations & Activities

- Story writing using AI-generated prompts
- Dream place description using structured prompts
- Event planning activity applying all TCREI components
- Logo design with name
- Vishnu & GDG logo design contest (Top three creative designs were awarded)

Key Outcomes

- Students gained hands-on experience with prompt engineering techniques.
- They understood how structured prompts influence AI responses.
- Creativity and analytical thinking improved through practical activities.
- Students were motivated to explore AI tools and participate in future GDG AI sessions.

Conclusion

The Hands-on Workshop on Prompt Engineering was conducted successfully with the active participation of 126 first-year students. Under the guidance of Mr. Harsha and the technical support of the AI team, the session provided both conceptual clarity and practical exposure. The workshop strengthened students' understanding of AI fundamentals and aligned well with GDG Vishnu's goal of building a collaborative, innovative, and technically skilled student community.
