HACK-A-TRON 3.0

Organised By : Google Developers Group on Campus VITB

Institution : Vishnu Institute of Technology, Bhimavaram

Date : 02/01/2026 - 03/01/2026

Duration : 24 hours

Mode : Offline

Venue : C Block-Ground Floor Seminar Hall, Software Labs, First Floor Open Lab.

INTRODUCTION

The **TechSprint Hackathon Hack-A-Tron 3.0** was organised by **GDGoC VITB.** The event aimed to provide a hands-on platform for students to ideate, develop, and deploy innovative technological solutions while working collaboratively in teams. Conducted over two days, the hackathon focused on experiential learning, real-world problem solving, and exposure to modern development and deployment practices.

PRE-EVENT LAUNCH

The event was officially kicked off with a banner launch held on **29th December 2025** at **C Block**, Vishnu Institute of Technology. The launch was accompanied by an energetic flash mob performance by **Vishnu Dancing Diaries**, which successfully created awareness and excitement among students across the campus and encouraged large-scale participation.

OBJECTIVE

- To encourage innovation and creative problem-solving among students
- To provide hands-on exposure to real-world software development practices
- To promote teamwork, collaboration, and leadership skills
- To familiarize participants with project deployment and version control platforms such as GitHub

- To bridge the gap between theoretical knowledge and practical implementation

PARTICIPATION

Total Registrations: 456 students
Students Shortlisted: 308
Teams Formed: 77
Teams Actively Participated: 62
Projects Developed: 60+ projects
The event witnessed enthusiastic participation from students of various departments, demonstrating a strong interest in hackathon-based learning.

EVENT FLOW AND EXECUTION

The hackathon commenced on **2nd January 2026** with an **inaugural session held at the Mini Auditorium**, where participants were briefed about the event structure, evaluation criteria, and code of conduct. Following the inauguration, teams moved to their respective venues and began working on their chosen problem statements.

The hackathon included **two rounds of evaluation**, where teams presented their progress and received constructive feedback from evaluators and mentors. These evaluation rounds helped participants refine their ideas, improve technical implementation, and align their solutions with real-world feasibility.

To maintain energy and engagement throughout the 24-hour duration, cultural and fun activities were incorporated. A singing activity was conducted during the event, followed by a **Harry Potter–themed treasure hunt at midnight**, which continued until **3:00 AM on 3rd January 2026**. These activities helped relieve stress and foster bonding among participants.

PROJECT DEVELOPMENT

A key highlight of Hack-A-Tron 3.0 was the strong emphasis on **project deployment**. Unlike traditional hackathons where projects remain limited to local execution, the majority of teams successfully deployed their applications. Participants have done the following :

- Deploy live applications
- Push code repositories to GitHub
- Follow structured and proper submission guidelines

This practical exposure significantly enhanced the technical maturity of the participants.

VALEDICTORY SESSION

The hackathon concluded with a **valedictory session on 3rd January 2026**, during which the winners were announced. The session recognized the efforts of all participating teams and appreciated their dedication, innovation, and perseverance throughout the event.

Winners - Team **N5N - X**

- **Team Lead :** Kondru Harsha Vardhan

1st Runner up - Team **Four Wizards**

- **Team Lead :** Venkata Nivas Linga

2nd Runner up - Team **Human Code**

- **Team Lead :** Shaik Siddiq Ali

FEEDBACK AND OUTCOMES

Feedback was collected from participants after the event. While certain areas for improvement were identified, the overall response was positive, with **over 60% positive feedback**. Participants appreciated the learning opportunities, mentoring support, and exposure to deployment practices.

The event significantly enhanced:

- Teamwork and collaboration

- Practical technical skills
- Understanding of deployment and version control
- Confidence in presenting and building real-world solutions

CONCLUSION

Hack-A-Tron 3.0 concluded successfully with widespread appreciation from students, mentors, and organizers. The event served as an impactful learning platform, encouraging students to move beyond ideation and focus on complete, deployable solutions. Overall, the hackathon achieved its objectives and reinforced the importance of experiential and collaborative learning in technical education.
